

# Revit Architecture Collaboration Training

## 1-day class

Revit Architecture is a Building Information Modeling (BIM) tool, which can be used by more than one person working on a new project. This is an important feature in collaboration within a project, between projects, and with other users, firms, and disciplines. The objective of the Revit Architecture Collaboration Tools class is to enable students who have a basic knowledge of Revit to increase their productivity while working with other people on a team, either in the same firm or with other firms, and while working with Revit files or other CAD files.

---

- **Phasing, Design Options, and Groups**
  - Applying Project Phasing
  - Using Design Options
  - Working with Groups
- **Linking Models**
  - Linking Models
  - Views and Linked Models
  - Copying and Monitoring Elements
  - Coordinating Linked Projects
- **Importing and Exporting**
  - Importing and Linking Vector Files
  - Modifying Imported Files
  - Importing Raster Image Files
  - Exporting Files
  - Exporting for Energy Analysis
- **Project Team Collaboration**
  - Introduction to Worksets
  - Opening and Saving Workset-Related Projects
  - Working in Workset-Related Projects
  - Visibility and Display Options with Worksharing
  - Worksharing and Linked Models
  - Setting up Worksets
  - Best Practices for Worksets
